Learn How Natural Healthcare Supports Conception

This seminar is recommended for women, men and couples who are considering starting or adding to their family, as well as professionals in the field of fertility. We will discuss common conditions related to reproductive health and the role that acupuncture, diet and lifestyle play in helping with:

- PCOS
- Endometriosis
- Prolactin, FSH, TSH
- Sperm parameters
- Menstrual irregularities
- Miscarriage
- Ovarian reserve
- IVF / FET / IUI / DI

Whether trying to conceive naturally or using assisted reproductive technology this seminar will help give you more control over your fertility journey.
